Session: 001
Time: 1612-1620

Summary of Information

A large, oval or circular, domed structure is central to the site. Predominant colors are white, black, and grey, and a gleaming or shiny/glossy appearance is significant. The structure is voluminous, but has a sense of honeycombing inside--lots of varying-sized spaces with rounded dimensional relationships. Inside there is an emphatic feeling of hollowness, height and volume, as well as echoing and directed lighting. Intersticing and structural girders are present away from the primary areas of interest inside the structure, creating a criss-crossing supportive effect. An acoustical quality is important here, and a sense of intangible aesthetics. Some aspects of the performing arts is central to this location.
